

# PRO-Aluminized Smoke Escaping Mask

*Your Emergent Lifesaving Tool Anytime & Anywhere*

According to survey, fire claims casualties in minutes and smoke is the biggest threat in firing place. The product is made from hi-tech materials, featuring easy putting on/taking off in emergent moment. With high-temperature resistance up to 450°C, it can filter toxins in dense smoke and stay in the fire for 15 to 20 minutes. Users can escape from the hazardous situation with ease and rapid. It is applicable in houses, recreation places or as outgoing and traveling.

## PRO ALUMINIZED SMOKE ESCAPING MASK I

### How to Use

Stretch elastic neck cover with both hands.

Put on hood upwards.

Pull elastics upwards from the front and across the head, then fasten in the rear of head.

Finish.

- (a) Hood Body : in use of aerospace-grade hi-tech heat-retaining Poltimide Film, capable of 450°C hi-temp resistance.
- (b) Smoke-proof & Toxin-filtering Mask : featuring 7-layer filtration, the first layer as fire-retardant layer made from oxide fiber cloth with 1200°C heat-resistance; the second-to-sixth layer known respectively as air-through layer, active carbon cloth layer; the seventh layer directly in contact with skin with comfort.
- (c) Fire-retardant Elastics : After putting on hood, pulling the strap forward from the rear of head to enhance the firm attachment between mask and mouth-nose parts and increase the fresh air supply for fear that exhaled vapor may blur the see-through window.
- (d) Elastic Neck Cover : attached to the neck to intensive intense smoke and toxins, applicable for all ages.
